Sharath

Java Full Stack Developer

Professional Summary:
Dynamic Full Stack Java Developer with 7 years of hands-on experience designing robust backend microservices and cloud-native systems. Proven expertise with J2EE design patterns and enterprise architectures.

Technical Skills:
Java, J2EE, Spring Boot, Spring Data, AWS (EC2, S3, RDS, CloudWatch), RESTful APIs, React, PostgreSQL, Docker, Kubernetes, CI/CD.

Work Experience:
Senior Backend Engineer | Apex Cloud Solutions (2021 - Present)
Built scalable microservices leveraging AWS EC2, S3, and RDS. Designed resilient J2EE pattern-based architectures ensuring 99.9% uptime. Communicated directly with enterprise clients to gather technical requirements and deliver sprint demos.

Java Developer | Infoway Technologies (2018 - 2021)
Created REST APIs with Spring Boot and integrated frontend React dashboards. Managed relational schemas in PostgreSQL.
